Figure 1: Schematic representation of the 1000 Genomes Project. The figure shows a horizontal bar representing the human genome, divided into segments representing different populations. The populations are labeled as follows: CEU (European), CHB (Chinese), JPT (Japanese), YRI (Yoruba), LWK (Luhya), GBR (British), FIN (Finnish), CHS (Chinese), PUR (Punjabi), and AFR (African). The bar is divided into segments representing different populations, with labels for each population. The segments are color-coded: CEU (blue), CHB (green), JPT (yellow), YRI (red), LWK (purple), GBR (orange), FIN (brown), CHS (pink), PUR (grey), and AFR (black). The bar is divided into segments representing different populations, with labels for each population. The segments are color-coded: CEU (blue), CHB (green), JPT (yellow), YRI (red), LWK (purple), GBR (orange), FIN (brown), CHS (pink), PUR (grey), and AFR (black).
